Topics:
**AN OPTIMIZATION BASED STUDY OF THE IMPACT OF
DIFFERENT PARAMETERS ON DNA DEGRADATION**

Manuscript Received on : 3/05/2022
Communication for Reviewing (Two Reviewers) : 3/5/2022
Date of Acceptance : 11-07-2022
Probable Publishing Date : 30-08-2022
(Vol. : 28 & Year : 2022)

This research paper is original and innovative. It has been subjected to peer review. Submitted manuscripts are assessed and reviewed by qualified editorial board members and invited two expert reviewers (one from India and one from abroad) from the relevant subject area following the double-blind peer review process, ensuring the fair evaluation policy to keep the publications plagiarism-free. Reviewers assess the quality, completeness, and correctness of research given in article submissions to journals based on the journal's needs, specified criteria, and the quality, completeness, and accuracy of the study presented. This certification is given to all authors of the document mentioned above for each legal.
